The OMSA course curriculum has been updated. We have integrated the didactic self-study curriculum with the information given at the weekend seminar.

The on-line self-study portion contains narrated PowerPoint Presentation lectures divided by “systems” into several modules. At the end of each module there is a short quiz to ensure that you understand the material presented before moving on to the next module.

After viewing the videos and completing the quizzes, you will be required to take an on-line Pre-test to ensure that you understand the material that was presented.

We will also utilize chat and forum technology to provide instructor feedback and extra help for students who are struggling with various concepts. The faculty monitoring the forums will be oral surgeons who are OMSA Committee members of CALAOMS.

The videos that you will view during the on-line self-study portion of the course will **NOT** be shown at the weekend seminar. At the weekend seminar, we will present a review of the material learned in the on-line self-study curriculum. The weekend will culminate in a final exam as usual.

“Initial OMSA Training Course”: on-line portion of course Required Prerequisite ~ BLS Provider card

You will be Mailed a confirmation packet with information regarding access to the required on-line self-study material. Work at your own pace over a three-four month period. All on-line curriculum must be completed by the assigned due date in order to be eligible to attend the weekend seminar. The final exam administered at the weekend seminar is based on learning all the material. **You will be monitored** to ensure you are completing the required on-line portion of the course by the due date. (24 CE credits are awarded)

“Recertification Course”: on-line review is Optional Prerequisite ~ Current OMSA Certificate & BLS Provider card
